SPECIFICATION AMENDMENT

Add the following new paragraph before the paragraph that begins on line 1 of page 9:

In some embodiments of the invention, an apparatus that is usable with a subterranean well includes a magnet to establish a flux field that at least partially extends through a portion of a downhole pipe. The apparatus also includes a winding to generate a signal that is produced by a change in a strength of the flux field to indicate a feature of the pipe. The winding has at least approximately 1000 turns.
